Surgeon's story:

Dr. Veerawat, known as Dr. V to his patients, has made a solid name in the plastic surgery field from his skills and attention to details. He is a sought-after breast augmentation (both round and shaped implants as well as newest technology for implants) for those who seek a natural look or advance look, breast lift / reduction and breast revision specialist, who gets most of his clients from referrals. He is one of the most requested surgeons amongst international clients and they called him 'Breast God'.

In addition to breast surgeries, he is very skilled and well trained from abroad in other fields such as face lifts, eyelid surgery, rhinoplasty, ear surgery, tummy tuck, Buttock implant as well as labiaplasty. Focused and professional, he aims to be honest with all of his patients to ensure that their expectations are realistic, reachable and they have all their questions answered before surgery. His goal is to have happy patients rather than gaining a large overall number of clients. He usually has a full schedule, despite this, new clients can get a quick/ detailed surgical recommendation from him. Generally, he prefers for his clients to have enough time for consultation and this allows the patients to have more time to consider the recommendation and surgical plan, as well as to ask any additional questions.

Dr.V is also dedicate to educating young surgeons to help them improve, he has been invited to give lectures and live surgery demonstration both in-bound and out-bound.
