

# Reduce Risks, Stay Strong, Secure Longevity

Monitor and screen organs affected by diseases related to smoking and air pollution.

Chest low-dose CT scan enables doctors to detect lung nodules or masses in their early stages, which may be too small to identify with a standard chest X-ray.

Health Check-up Programs for Individuals Exposed to Smoke and Air Pollution

## Lung Vitality Care Programs

| Test/Exam List   | Lung Vitality Care | Lung Vitality Care Plus |
|--|--------------------|-------------------------|
